## Get the look of real wood and the durability of aluminum with Weatherwood™

**M**ake the most of your patio or sunroom project with Duralum's extensive line of Weatherwood™ products. Available in four distinctive cuts and eight natural color choices, Weatherwood™ offers a lifetime of beauty and value.

All designs are configured for loads as high as 30 lbs. per square foot, wind speeds up to 110 mph and seismic activity Category D. Each Weatherwood™ component adheres to the same strict standards – from design to quality control to engineering specifications – and all meet or exceed national building codes.

Unlike wood, aluminum offers a maintenance free finish and durability. The difference is easy to see.

Weatherwood™ features a low-maintenance, durable Dupont™ Teflon® surface protector finish. Teflon is universally recognized for its non-stick properties, heat resistance and resistance to corrosion. Its surface protection enhances resistance to dirt and stains for easy-to-clean performance.\*
